BUILDING OPERATIONS

SOUTH AUSTRALIA

DECEMBER QUARTER 1962

SCOPE

This bulletin gives information about "new building" operations in South Australia; in addition to a summary for the period January 1958 to December 1962 it shows details concerning houses and flats, other buildings, employment in the industry, and dwellings in Local Government areas. The information has been compiled from returns collected from all builders of "new buildings".

DEFINITIONS

NEW BUILDINGS : Additions of £5,000 and over to existing buildings (other than houses) are included, but minor additions, alterations, repairs and renovations, and all construction activity such as railways, bridges, earthworks, water storage, etc., are excluded.

VALUE : All values shown exclude the value of land and, except for Table 4, represent the value of buildings upon completion (but see also COMPLETIONS). The values shown in Table 4 represent the value of work done on new buildings during the period.

COMMENCEMENTS : A building is recorded as commenced when work on the foundations has begun.

UNDER CONSTRUCTION : Once commenced, even though work on it may have been temporarily suspended, a building is classified as "under construction" until its "completion".

COMPLETIONS : A building is regarded as having been completed when the contractor has fulfilled the terms of the contract or in the case of an owner-built house when the dwelling is either completed or occupied (whichever occurs first). However, the value in all cases is that of the building as a finished project as planned.

COMMENTS

Table 1 shows that 2,444 houses were commenced and 2,480 completed during December quarter 1962, a decrease of 43 commencements and an increase of 106 completions on figures for the previous quarter.

The number of flats completed during December quarter (198) was the highest since June quarter 1961 (230).

The considerable fluctuations from period to period in the value of "new buildings other than dwellings" in Table 3 are partly the result of the unequal incidence of individual large contracts. Table 4, which shows the value of work done on the various types of new buildings during each period, is not subject to these fluctuations.

The number recorded as employed on all jobs of builders of new buildings (Table 6) increased for the third successive quarter. The total of 13,442 at 12th December 1962 was 608 more than at 30th September 1962 and the highest since 14th December 1960 when 14,081 were reported as being employed.

As shown in Table 7 a large proportion of home building is concentrated within a few local government areas. During the year ended 31st December last 3,592 (74.1 per cent) of dwellings completed in metropolitan local government areas were in the Municipal Corporations of Campbelltown, Enfield, Marion, Mitcham, West Torrens, and Woodville. Of dwellings completed outside the metropolitan area 61.5 per cent were in the near metropolitan District Councils of Munno Para, Noarlunga, Salisbury, and Tea Tree Gully; completions in the Whyalla City Commission area accounted for a further 8.1 per cent.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the transparency and accountability of the organization. This section also outlines the various methods used to collect and analyze data, ensuring that the information is reliable and up-to-date.

2. The second part of the document focuses on the implementation of these practices across different departments. It provides a detailed overview of the roles and responsibilities of each team, as well as the specific steps required to ensure compliance with the established protocols. This section also includes a timeline for the implementation of these measures, allowing for a clear understanding of the progress and any potential challenges.

3. The third part of the document addresses the ongoing monitoring and evaluation of the implemented measures. It describes the various metrics used to assess the effectiveness of the practices and the frequency of the reviews. This section also outlines the process for identifying and addressing any issues that may arise, ensuring that the organization remains committed to continuous improvement.

4. The final part of the document provides a summary of the key findings and conclusions. It highlights the overall success of the implemented measures and the positive impact they have had on the organization's operations. This section also includes a list of recommendations for future actions, ensuring that the organization remains on track with its goals and objectives.

(a) Covers all contractors and sub-contractors and employees of contractors, sub-contractors, and Government instrumentalities, who on the day specified were actually engaged on the construction, alteration, repair, and maintenance of buildings, but excludes persons working on owner-built houses or for contractors or sub-contractors who undertake only alterations, additions, repairs, and maintenance. Persons "actually engaged" include those temporarily laid off because of weather. Some duplication may occur as a result of frequent movement between jobs or because some persons (such as electricians) may work on several jobs which are under construction simultaneously.
